# Menu Overview the Builder

The main menu **Builder** is situated in the menu bar of MagicDraw. The window of the Model Compiler has a menu bar of its own (see Menu Overview of the xUML Model Compiler).

Menu Item	Hotkey	Description
New Builder Project	Ctrl-Shift-N	Opens a dialog window to create a new Builder project.
Open Builder Project	Ctrl-Shift-O	Opens a file chooser dialog to select an existing Builder project.
Reopen Builder Project		Show a list of recently opened Builder projects to select from.
Settings		Opens the settings dialog of the current Builder project.
Open Model		Shows a list of all models of the open Builder project to select from.
Views > Messages	Ctrl-Shift-M	Hides or shows the E2E Messages window.
Views > Model Compiler		Hides or shows the E2E Model Compiler window.
Refresh	F5	Updates all views in the floating windows that have been opened. In the Model Compiler, all descriptors in the XMI files are refreshed depending on updated information in the UML diagrams.
Documentation		Shows helpful documentation links: to the Scheer PAS Documentation Home, the Reference Guide and the development tutorials.
Examples		Shows a dialog to install the xUML service Examples.
About		Shows version and release date of the Builder.
