

# Mobile on Android Devices

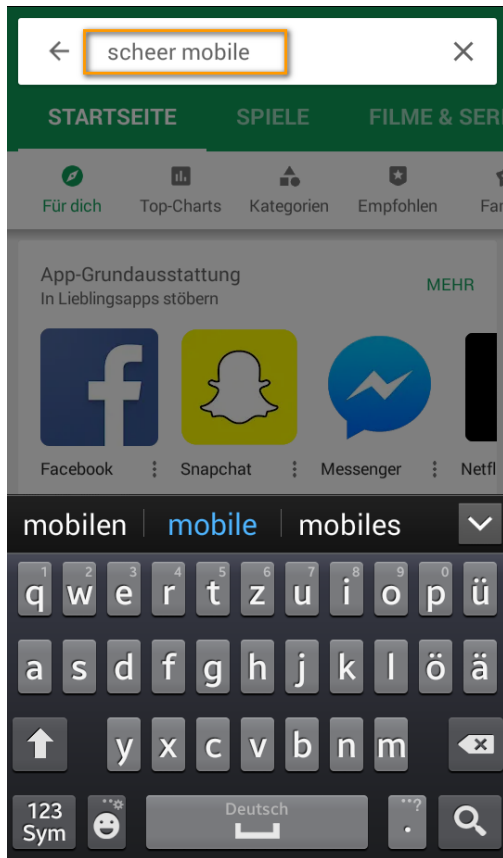

In order to use **Scheer PAS Mobile** entirely, you need a valid account for **Scheer PAS BPaaS** and a mobile device with the installed mobile app.

Customers using **Scheer PAS BPaaS** on premise will receive a separate help page for the installation of the mobile app from their system administrator.

## Installation from Google Play Store

With a few simple steps you can download the **Scheer PAS Mobile** app from the Google Play Store to your device.

Open the Google Play Store on your device and search for **Scheer Mobile**.

The **Scheer PAS Mobile** app will be displayed in the hit list. Tap the link to switch to the installation screen.

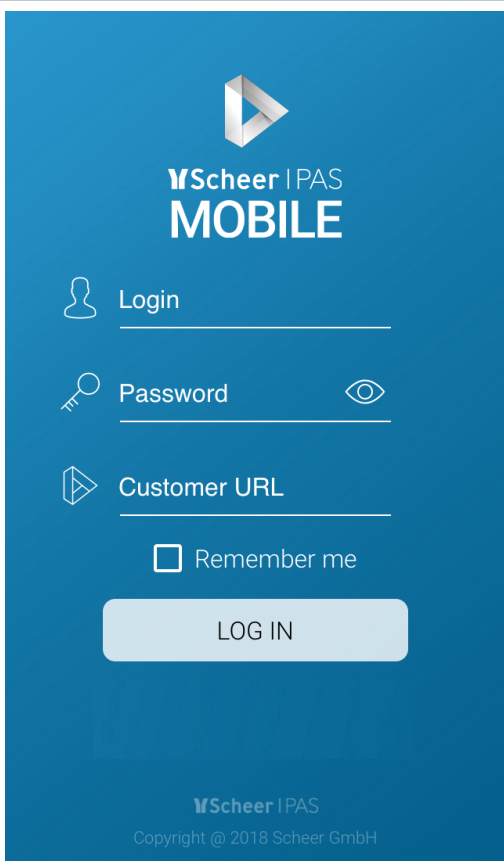

Start the installation by clicking the **Install** button. For more information about the app, use the **Read More** link.

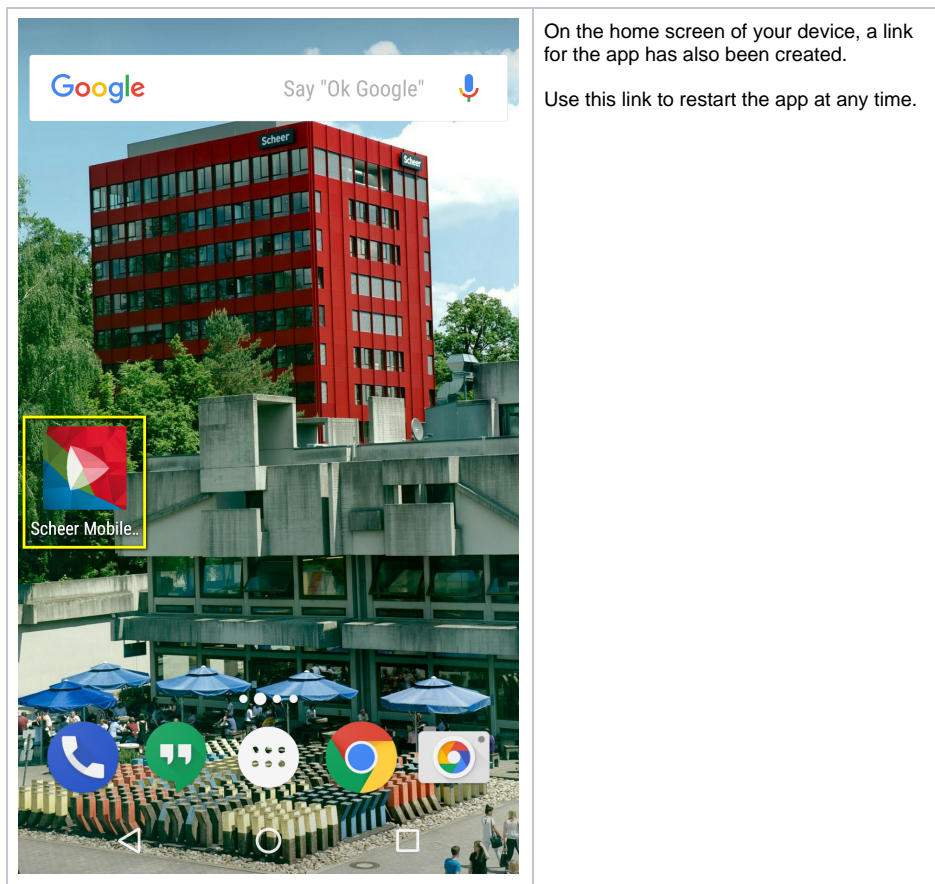

A description of the app as well as further information and views of the different app content pages will be displayed.

As soon as the installation is finished, you can switch directly to the app by clicking the **Open** button.

Use your **Scheer PAS BPaaS** login credentials on the app's login page.

## Log in to the **Scheer PAS** Mobile App

When opening the app for the first time, you have to log in with your **Scheer PAS BPaaS** user data.

### Login for Cloud Customers

The image shows the login screen of the YScheer IPAS MOBILE app. It has a blue background. At the top is the YScheer IPAS MOBILE logo. Below it are three input fields: 'Login' with a person icon, 'Password' with a key icon and an eye icon for toggling visibility, and 'Customer URL' with a play icon. Below these fields is a 'Remember me' checkbox. At the bottom is a 'LOG IN' button. The footer contains the YScheer IPAS logo and the text 'Copyright @ 2018 Scheer GmbH'.

You will find three input fields on the app's login screen:

- **Login**
- **Password**
- **Customer URL**

Login and password correspond to your **Scheer PAS BPaaS** credentials.

The **Customer URL** will be communicated by Scheer GmbH.

 It is possible that a customer uses several customer systems, for example if separate test and production systems are used. In this case, the entry in the **Customer URL** field determines which system the mobile app accesses.

This image is identical to the one above, but with an orange rectangle highlighting the 'Remember me' checkbox.

Active the checkbox **Remember me** if you want to save your credentials for the next sessions in the app.

 This option is only available if you have activated the display lock (e.g. PIN, pattern or fingerprint) for your mobile device. If this is not the case, the option is grayed out.
