

End Event

Element	End Event 
Description	The End Event marks the end of a process. If the process consists of several branches, all other open branches continue to run to their end. Every process branch needs its proper end event.
Attributes	• Name • Description • Symbol Type
Particularity	-
Execution	On Event: Without input or output parameters.
Editing and Styling	• Refer to Working with the BPMN Editor for further information regarding editing of BPMN elements using the different context menus on the diagram pane. • Refer to Styling BPMN Elements for further information regarding styling possibilities for BPMN elements, for example how to change the background color, the font style and size etc.

BPMN_End_Event_Example

Click the icon to download a simple example model that shows what you can do with **End Events** in **Scheer PAS Designer**.
