Service Task

Element						
Description	A **Service Task** is executed automatically when the process reaches it and the process continues to the next element when the execution ends. Use the execution pane to create the corresponding execution diagram defining the service task.					
Attributes	**Name** **Description** **Symbol Type**					
Particularity	-					
State	Executed_<name of the task with underscores>, e.g. **Executed_Do_something**					
Execution	**Name**	**Parameters**	**Type**	**Direction**	**Description**	**API**
	On Exit	-	-	-	Implement here what the service task should do.	-
Editing and Styling	- Refer to Working with the BPMN Editor for further information regarding editing of BPMN elements using the different context menus on the diagram pane. - Refer to Styling BPMN Elements for further information regarding styling possibilities for BPMN elements, for example how to change the background color, the font style and size etc.
