# About Us

Let's Talk Change!

Scheer PAS is an innovative software company that provides digitization support to companies and organizations by helping them to implement necessary changes in their processes and applications as smoothly and quickly as possible.

Agile and customer-focused.

At Scheer PAS, we link people, processes and systems organically – and the existing infrastructure of our customers serves as the central basis. Through agile automation of critical business processes on the basis of digital applications and their integration into existing infrastructure, the low code platform ensures fast reaction to current challenges and it enables end-to-end digitization of all processes.

High performance.

Scheer PAS combines flexibility and reaction speed, and thus ensures that companies remain effective in times of uncertain future requirements. As the only provider of a digital transformation platform, which comprehensively maps the core topics of process integration, IT automation, and application development in a single solution, Scheer PAS combines a tested philosophy – Model2Execute – with a flexible and powerful software technology.

We enable change. Fast, smooth, secure.
