

PAS Designer User Guide

You are reading the user guide for **Scheer PAS Designer**.

It explains how to...

- ... structure your work within the Designer using the **Explorer**.
- ... configure Designer services in the **Service Panel** and how to use the Designer panels.
- ... model business processes using the **BPMN Editor**.
- ... design forms for your users to fill in during process execution using the **Form Editor**.
- ... make your BPMN model executable by adding executions in the **Execution Editor**.
- ... define data structures and mappings with the **Mapping Editor**.

You will also gain an insight into

- how to create and use connectors.
- how to work with libraries.
- how to configure the process instance list.
- how to create a role-based application.
- how to validate and test your services.
- how to deploy a service.
- how to execute Designer applications.

The **Troubleshooting** chapter helps you with resolving problems during modeling and executing services.

Guidance for Designer Documentation

Creating and running services in Designer consists of several steps, all of which are explained in detail in the documentation:

Working Step in the Designer	Related Documentation
Service Development	• Creating Connectors • Modeling BPMN • Modeling Forms • Modeling APIs • Implementing Your Process • Working With Libraries • Configuring the Instance List
Service Validation and Testing	• Validating and Testing a Service
Service Deployment	• Deploying a Service
Service / Application Execution	• Running Designer Applications
