

# Managing Users in a Scheer PAS Environment

PAS 21.1 You can operate a Bridge standalone or as part of a Scheer PAS installation.

- If installed as part of Scheer PAS, all users are managed in **Scheer PAS User Management**.
- If installed standalone, all users are [managed in the Bridge itself](#).

## Step 1: Create User in Scheer PAS User Administration

Refer to the [Scheer PAS | Administration Guide](#) for more information on how to add, edit, and delete users in a Scheer PAS environment.

 Users that should have access to the Bridge must have profile **integration\_user** assigned.

## Step 2: Create User in Bridge

For the user to be able to access the Bridge, you must create a user having the same **User Id** in the Bridge. How to do this is explained in detail in [Creating a User](#).

Create User

User Id

holden.caulfield

User Name

Holden Caulfield

Active

☒

Group ID

production

Create User

Cancel

Setting	Description
User Id	Enter the same <b>User Id</b> you have used to create the user in <b>Scheer PAS User Management</b> .
User Name	Letters, numeric characters, space character, and the following special characters are allowed: , : . _ / ( ) = ? } [ ] @ # ! > - <div>It is allowed to use a different <b>User Name</b> than defined in <b>Scheer PAS User Management</b> but not recommended.</div>
Active	You need to activate the user by selecting checkbox <b>Active</b> . Only active users can login to the Bridge.
Group Id	The dropdown menu provides all group ids existing in the domain. Depending on your choice, the user will have full or restricted access to the functions of the Bridge (see <a href="#">Group Roles</a> ).

You do not need to configure a password. The password is stored in **Scheer PAS User Management**.
