

Analyzer 5

Bridge 5 has reached the end of its life-cycle and is no longer supported. To get maintenance and feature releases, update to the latest [Bridge](#) version.

Dependencies to xUML Runtime and Builder

The following bugfixes and features depend on a new version of the xUML Runtime. Please install the required RUNTIME version.

xUML Runtime	Builder	Analyzer	Issues	xUML Runtime/Builder Dependency
	5.1.17.2	5.1.17.2	ANA-1226	Importing WSDL or repository in an older Analyzer version will result in incorrect host name for SOAP operations. You can manually change the host name. You should always use a matching Analyzer and Builder version.
2014.17		5.1.9.4	ANA-1102	The stated xUML Runtime is needed for SOAP 1.2 support in test cases.
5.1.88.0		5.1.8.42	ANA-781, ANA-813	If the required xUML Runtime is not used, the state diagram will not be displayed correctly.
