Edit a Calculated Attribute

Editing Data of a Calculated Attribute

Display the list of attributes by selecting Calculated Attributes from the sidebar menu:

You can filter the list of attributes by typing into the search field of the filter bar. The number of matching attributes is displayed on the right side of the search field. If no filter has been set, the list shows the total number of available attributes:

Open the corresponding data sheet by clicking the

In the attribute's data sheet, you can now edit the calculation rule of the attribute.

Please note that you cannot change the master data of a calculated attribute once it has been created. You can only rework its calculation rule.

Deleting a Calculated Attribute

Display the list of attributes by selecting Calculated Attributes from the sidebar menu:

On this Page:
