

Managing Cron Jobs

The **Scheer PAS Cron Manager** enables users of the platform to schedule jobs to run periodically at fixed times, dates, or intervals. This chapter explains how to use the Cron Manager to create and maintain your cron jobs.

The start page of the Cron Manager displays all available cron jobs.

It is also the starting point to...

- ... create new cron jobs.
- ... edit the available cron jobs.
- ... manage your cron jobs.
- ... view log entries for your cron jobs.
