

Installing the Analyzer

There are two different branches of the Analyzer: one for usage in a PAS environment, one to use with the Bridge. Please download the installer that matches your installation.

System Requirements

The **Scheer PAS Analyzer** runs on a 64 bit x86 machine. A minimum of 2 GB RAM is required.

Operating System

The following operating systems are supported by the Analyzer:

- Windows® 10
- Windows® 8.1
- Windows® 7
- Linux
