

Monitoring Software Robots

From your **Scheer PAS Cockpit** you are able to monitor the execution of your robots. To do so, go to sidebar **Additional Actions** and click on button **Show Software Robot Queue**:

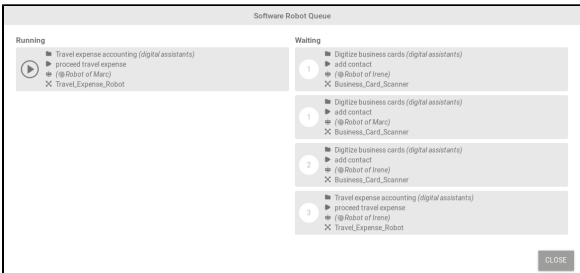

The button opens the window **Software Robot Queue**.

Overview on Robots in Use

In the window **Software Robot Queue** you can find two status queues:

- **Running:** As soon as a robot started working, it is displayed here.
- **Waiting:** Lists the robots still to be processed.

Displayed Informations

Icon	Content
	Name of the BPaaS project.
	Name of the current process step.
	Name of the selected robot. If option Select robot automatically has been chosen for the Robot ID, the name of the environment is shown.
	Name of the robot process as defined in UIPath Orchestrator .

The monitoring window always shows the current situation and does not reload dynamically.
