Section **Error Logs** allows the user to search the logs of the cron job.

See page [Reading the Logs of a Cron Job](#) for further details.

The maximum size of the error log for each cron job is predefined automatically. You can adjust the

value in the service-specific configuration file, refer to [Adapting Integration Service Configuration for further](#)

er information in the configuration file, adjust the property error Log Max Size and restart the cron-service. P
