

Analyzer 6

Bridge 6 has reached the end of its life-cycle and is no longer supported. To get maintenance and feature releases, update to the latest [Bridge](#) version.

Dependencies to xUML Runtime and Builder

The following bugfixes and features depend on a new version of the xUML Runtime or Builder. Please install the required RUNTIME/Builder version.

Please consider the [xUML Runtime dependencies of Analyzer 5.1](#) if you upgrade from such a version.

xUML Runtime	Builder	Analyzer	Issues	xUML Runtime/Builder Dependency
	6.0.17.2	6.0.17.2	ANA-1226	Importing WSDL or repository in an older Analyzer version will result in incorrect host name for SOAP operations. You can manually change the host name. You should always use a matching Analyzer and Builder version.
2014.17		6.0.1.4	ANA-1102	The stated xUML Runtime is needed for SOAP 1.2 support in test cases.
