

Errors Importing a WSDL / XSD File

If an error occurred during the importing process, you will be notified by the Importer.

Question

Error Importing WSDL/XSD

Do you wish to continue?
Not all structures might be imported.
Open the E2E Builder Messages window (menu E2E Builder / Views) for further information.

ContinueCancel

The import process may be canceled or continued, accepting that not all structures may be imported due to the error.

Continuing to import an erroneous definition may lead to corrupted elements within the model.

Detailed information about the import errors is displayed in the E2E Builder Messages window. In order to open the Messages window, select **Views > Messages** from the E2E Builder menu.
