

# The Elements of the Builder Window

The MagicDraw window is divided into four parts:

1. the [Window Title](#) comprising the main menu and the main toolbars
2. the [Diagram Pane](#) comprising the middle toolbar
3. the [Model Browser](#) containing the E2E Model Compiler window
4. the [Status Bar](#) at the bottom of the window.

## The Window Title

The MagicDraw window title shows the **Scheer PAS BUILDER** being installed: the MagicDraw window title has been substituted and now shows

- the MagicDraw version
- the Builder project name
- and the path of the open UML model in square brackets

A screenshot of the 'Builder' menu in the MagicDraw application. The menu is open, showing several options: 'New Builder Project' (with a plus icon and keyboard shortcut Ctrl+Shift+N), 'Open Builder Project' (with a folder icon and keyboard shortcut Ctrl+Shift+O, highlighted by a mouse cursor), 'Reopen Builder Project' (with a circular arrow icon), 'Settings' (with a gear icon), 'Open Model' (with a document icon), 'Views' (with a magnifying glass icon), 'Refresh' (with a circular arrow icon and keyboard shortcut F5), 'Documentation' (with a book icon), 'Examples' (with a document icon), and 'About' (with an information icon).	<p>The <b>Builder</b> menu item has been plugged into the MagicDraw main menu. Via this menu item all Builder functionality can be accessed.</p>

The MagicDraw file menu has also been adorned with an extra menu item **Model Execution & Integration** that allows quick access to all Builder file operations.

The **Custom Diagrams** toolbar of MagicDraw has been extended by the following icons:

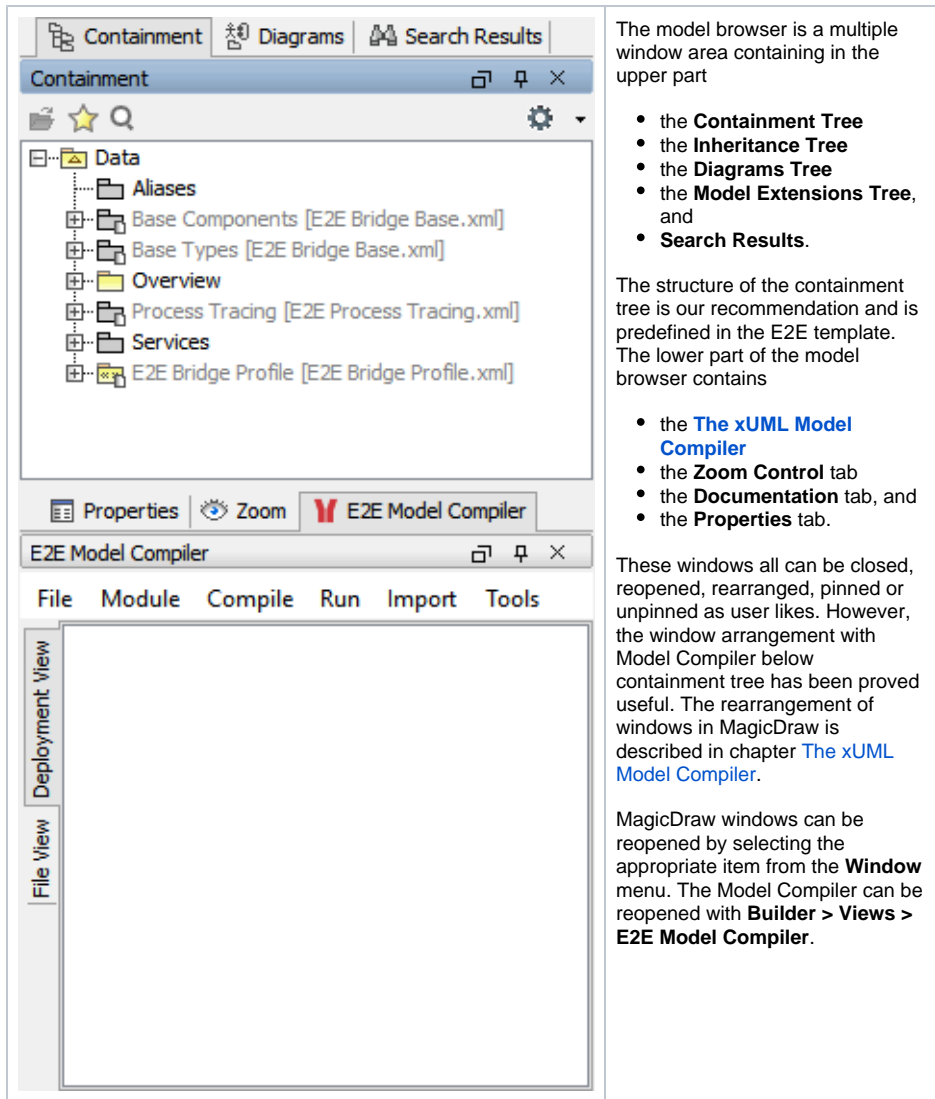

Icon	Function
	Start E2E Components Wizard
	Start E2E Library Wizard

## The Diagram Pane

The diagram pane contains the graphical tablet on which the diagrams are drawn. On the left of the diagram pane the middle toolbar offers diagram UML elements to be used for drawing. These elements are dependent on the diagram type.

## The Model Browser

## The Status Bar

The MagicDraw Status bar shows MagicDraw status information on the current UML model, such as errors, warnings, hints and messages. These are indicated by an envelop or an icon. Click on these icons to get more information.

The MagicDraw errors and warnings are not to be confused with Builder errors and warnings displayed in the Model Compiler window.

The Status bar can be hidden and shown via **View > Status Line > Show Status Bar**.
