

# E2E Authorization Package

This Node.js module works with the E2E Authorisation Server and provides a simple authentication and authorization process for both, resource servers and client applications.

Simply add a dependency to **e2e-auth** in your **package.json** file or install it using:

```
npm install e2e-auth
```

You can find more a more detailed documentation of the package on the [GitHub](#) or [NPM](#) pages.
