

E2E Profile

Notation

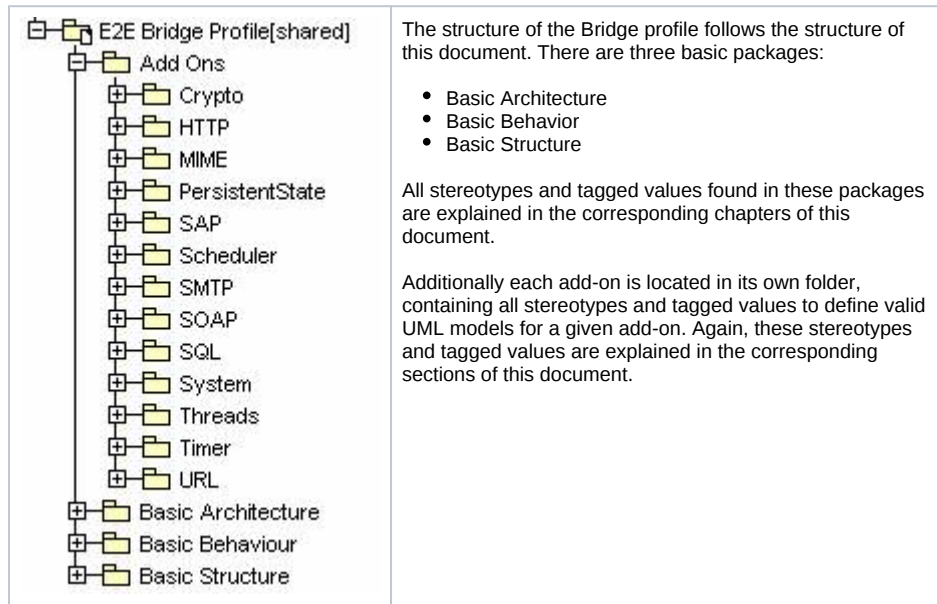

All stereotypes defined by E2E start with a capital letter and have an icon assigned. The default UML stereotypes are written completely in lower case and do not have an icon assigned.

All tagged values defined by E2E start with a lower letter and do not have an icon assigned.

Structure

Location

The Bridge profile location depends on the UML editor in use. For example, Magic Draw puts all profiles into <MagicDraw install root>/profiles. The name of the profile file is **E2E Bridge Profile.xml.zip**.
