

Dynamic Configuration of SQL Adapters

This page explains the **SQL Adapter** in Bridge context. If you were looking for the same information regarding the [PAS Designer](#), refer to [SQL Adapter](#) in the Designer guide.

The SQL connection can be configured statically in the component diagram on the [SQL alias](#). However, sometimes it is necessary to set user and password at runtime. This can be done using the [SQL Configuration Adapter](#).

Example File (Builder projectAdd-ons/SQL):

<your example path>\Add-ons\SQL\uml\sqlConfiguration.xml

The SQL Configuration Adapter can be used to set the authentication parameters only, as is explained in the following diagram:

Class **SQLConfiguration** contains the authentication information:
