

Installing the Builder for MagicDraw 18

The (Cameo) Builder is integrated and to be used with the MagicDraw 18.0 UML Design Software. The installation of the BUILDER comprises three steps:

1. Installing **MagicDraw 18.0**
2. Optional: Installing the **Cameo Business Modeler** plugin
3. Installing the **Builder** plugin

Prerequisites

System Requirements

Builder for MagicDraw runs on a 64 bit x86 machine. A minimum of 2 GB RAM is required.

Operating System

The following operating systems are supported by Builder for MagicDraw:

- Windows® 10
- Windows® 8.1
- Windows® 7

Builder and MagicDraw Version

The Builder plugin is designed for the following MagicDraw versions:

Builder Version	MagicDraw Version
Builder 7	MagicDraw UML 18.0 SP6
Builder 6	MagicDraw UML 18.0 SP6

Please note that the Builder does not support minor MagicDraw versions such as MagicDraw 18.x.
