

Options: Build Bridge Repository

Using this option you can overwrite the preferences of all [Build test actions](#).

Test Preferences

Edit test action preferences and compare functions

UML Document

...

Deployment

Repository

...

☒ Clean before compile

☐ Do not clean before compile

Project Folder

...

OK

Cancel

In general, all options can be overwritten. Clear all fields whom you want to keep the value defined in the test action, and enter values in the fields only that you want to overwrite.

Preference	Description
UML Document	Overwrite name and path of the UML model you want to build the repository of.
Deployment	Overwrite the deployment of the selected model.
Repository	Overwrite name and path of the repository to be created.
Clean before compile	Overwrite whether to perform a clean before compile or not.
Project Folder	Overwrite the project folder of the project the model belongs to.
