

text

If you want to use white spaces like tabs, new lines, or carriage returns in a string, use the text() macro.

Syntax	<pre>aWhitespaceString = text(LITERAL);</pre>	
Semantics	<p>Transforms all escaped white spaces found in a string literal to a real white space. The text macro takes only string literals as parameter. Returns a new string. Only the following white spaces are supported:</p> <ul style="list-style-type: none">• \n new line• \r carriage return• \t tab	
Substitutables	LITERAL	String literal.
Examples	<p>The literal contains the escaped white space \n, which is transformed to a real line break.</p> <pre>set whitespaceString = text("First line.\nSecond line.");</pre>	

Example File (Builder project E2E Action Language/BaseTypes):
