

# convertBase64ToBlob

Syntax	<pre>set aBlob = base64String.convertBase64ToBlob() set aBlob = convertBase64ToBlob(LITERAL)</pre>	
Semantics	convertBase64ToBlob( ) converts a base64 string into an internal blob object. If the conversion is not possible, an error message is raised (for instance: NULL strings).	
Substitutables	base64String	Can be any variable or object attribute being a valid base64 string.
	LITERAL	Base64 string literal.
Examples	<pre>set aBlob = convertBase64ToBlob ("aW9uPSIxLjAiIGVuY29kaW5nPSJldGYtOCI/Pgo8");</pre>
