# Deleting a Group

Groups can only be deleted, if no user is assigned to the group anymore. The button **Delete** will be disabled accordingly.
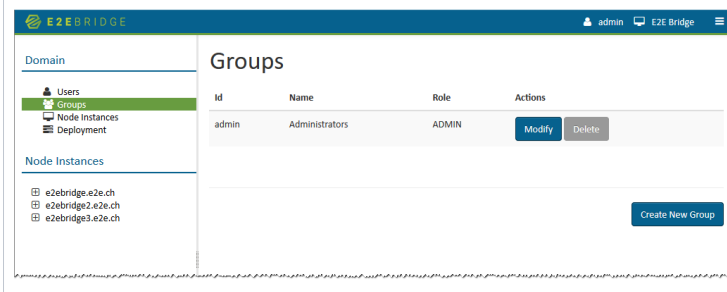

> The pre-defined group **Administrators** cannot be deleted.

	Click **Delete** on the corresponding group you want to remove.
	You need to confirm the removal of the group by clicking **Delete Group**. You may also **Cancel** the transaction.
	After deleting the group, the modified group list will be displayed again.
