

Modifying a Group

For the pre-defined group **Administrators**, only the group name may be changed. For all other groups, also the role assignment can be modified.

The screenshot shows the E2E Bridge web application interface. The top navigation bar is dark blue with the E2E Bridge logo and user information (admin, E2E Bridge). The left sidebar is white with a blue header 'Domain' and a tree view containing 'Users', 'Groups', 'Node Instances', and 'Deployment'. The 'Groups' section is selected. The main content area is white and titled 'Groups'. It contains a table with the following data:

Id	Name	Role	Actions
Team_1	Developers 1	MODELER	Modify Delete
admin	Administrators	ADMIN	Modify Delete

A red arrow points to the 'Modify' button for the 'Team_1' group. Below the table is a 'Create New Group' button.

The mask for modifying groups will be displayed.

Modify Group

Group Id	Team_1
Group Name	<input type="text" value="Developers Team 1"/>
Role Id	<input type="text" value="MODELER"/> ▼
Members	<div></div>

Group Name	Letters, numeric characters, space character, and the following special characters are allowed: , : . _ / () = ? [] @ # ! > -
Role Id	The dropdown menu provides the roles ADMIN , MODELER , and USER .
Members	All users that have been assigned to this group, are listed.

Click **Apply** to complete the transaction. The modification of the group will be replicated to each node instance of the domain. Canceling the transaction with **Cancel** will bring you back to the group list.
