

Node.js Interface to the Bridge

This Node.js modul allows to interact with the Bridge. The Bridge lib can be used to

- **deploy, remove, start** and **stop** xUML, Node.js and Java Services,
- set the **preferences** of xUML, Node.js and Java Services,
- **kill** xUML Services
- **pack** Node.js Services

Simply add a dependency to **e2e-bridge-lib** in your **package.json** file or install it using:

```
npm install e2e-bridge-lib
```

You can find more a more detailed documentation of the package on the [GitHub](#) or [NPM](#) pages.

Usage Example

```
var E2EBridge = require('e2e-bridge-lib');
var bridgeInstance = new E2EBridge('localhost', 8080, 'admin', 'admin');

bridgeInstance.startXUMLService('PurchaseOrderExample', function(error){
  if(error) {
    console.error('Error occured: ' + error.errorType);
  } else {
    console.log('Startup done.');
```
