

Adding a Role

During modelling, you can create roles in the BPMN editor (Designer) and in the BPaaS editor. You can also create them in the **Roles** menu of the user management.

When a role is created during modeling, only the role's name is determined. All other settings have to be inserted in the role's data sheet in the user management.

Creating a Role in the User Management

	Select option Add Role from the sidebar menu.
	An empty role data sheet opens.

Saved successfully! [View role data sheet](#)

The role data sheet is closed, the message **Successfully saved!** is displayed and the role is added to the list.

You can use the link from the success message to reopen the role's data sheet.

Before saving the role, you can also [assign users](#) and [insert translations](#) first. But it is not mandatory to assign users or insert translations to create a role.

Assigning Users

← → New Role

Description
Role for the HR onboarding process

User (0)

No users are assigned to this role.

[ASSIGN](#)

SAVE CANCEL

In a role data sheet, the users assigned to the role are listed in the **User** section.

If you create a new role, you start with an empty **User** section. If you want to, you can assign the users to a role within the profile's data sheet.

Click button **Assign** to assign users to the role.

SAVE CANCEL

Your selection is transferred to the **User** section of the role data sheet.

When all necessary users have been assigned, you can save the role data sheet or continue to edit the role by [inserting translations](#).

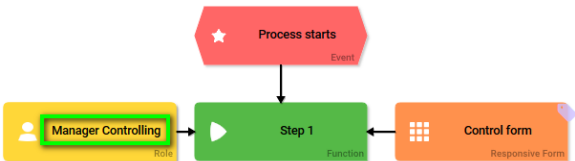

When a user is added or removed

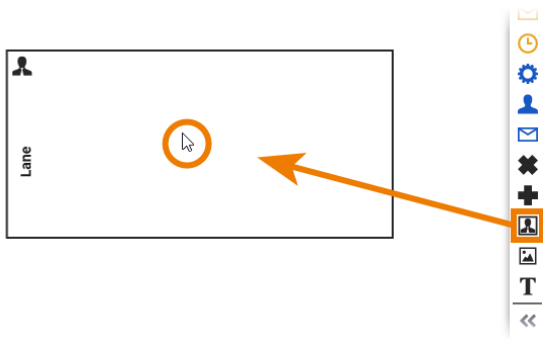

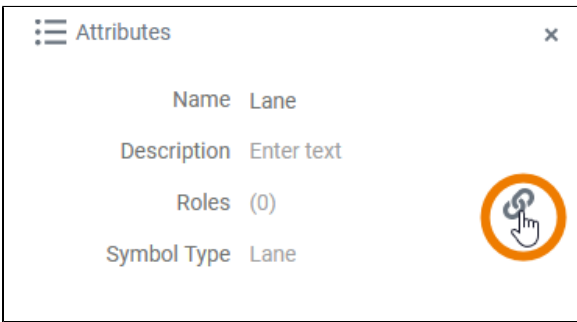

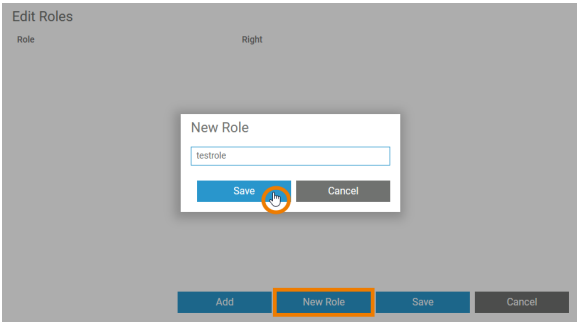

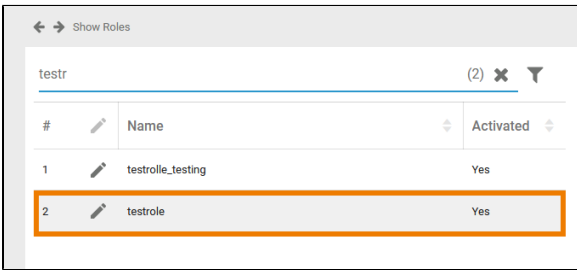

ed a role, they must log in to the system again for the changes to affect their account. This also applies to the **Scheer PAS** Mobile A

Inserting Translations (BPaaS)

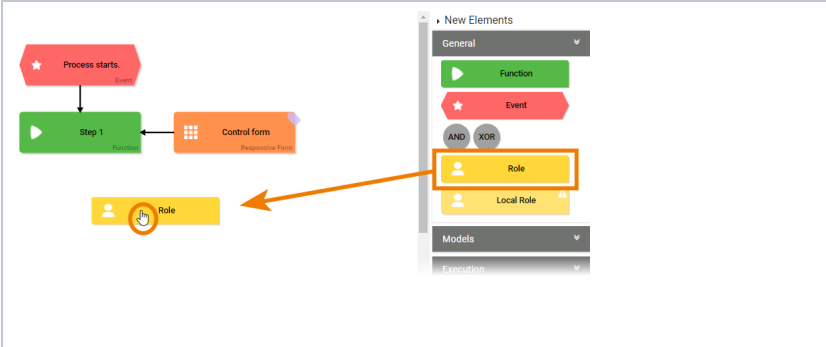

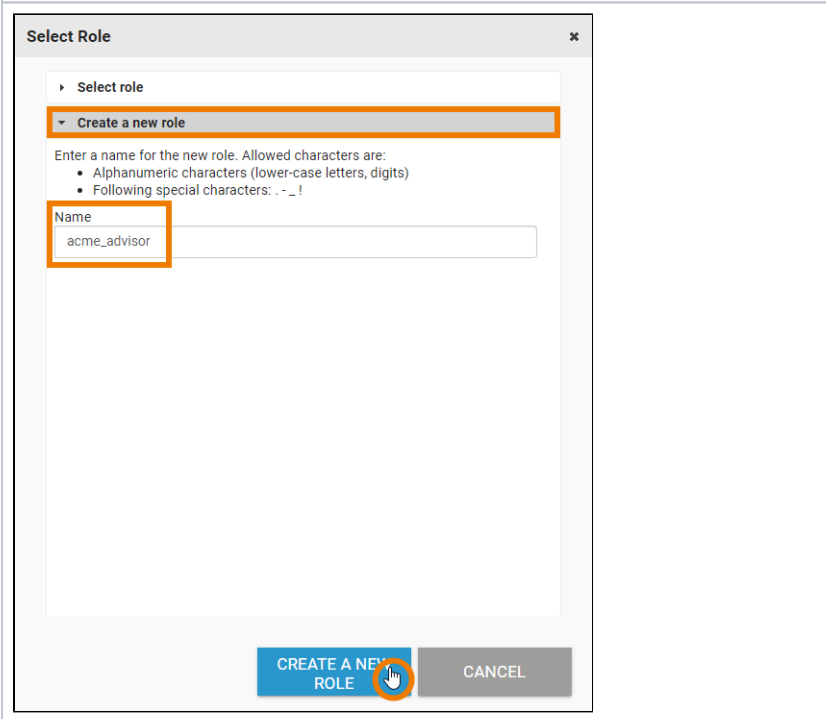

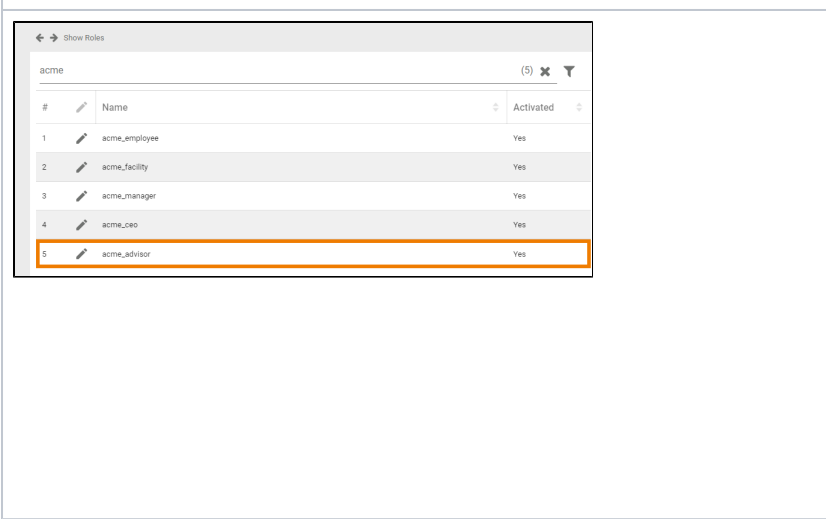

The role name inserted in section **Master Data** is a technical name for the role. In section **Translations** you can insert translations for the profile's display names (this applies to usage in BPaaS only).

<div>Translations</div> <div>EDIT TRANSLATIONS</div>	Use window Translations to insert the display name in different languages.
<div>Translations</div> <div>German</div> <div>English</div> <div>French</div>	<p>Clicking button Edit Translations will show the fields German, English and French.</p> <p>The names inserted in those fields will be shown in BPaaS according to the language selected for the user interface.</p>
 <pre>graph TD; Start([Process starts]) --> Manager[Manager Controlling]; Manager --> Step1[Step 1]; Step1 --> Control[Control form];</pre>	The names saved in this section will be shown in the EPC models in BPaaS according to the language selected for the BPaaS user interface.

Creating a Role in the Designer

	Designer users can create roles during modelling in the BPMN editor by using the Lane element.									
	To create a new role, open the Attributes of the lane element and click icon  to open the role editor.									
	Click button New Role to create a new role and assign it to the lane element.									
 <table data-bbox="190 1281 714 1413"><thead><tr><th>#</th><th>Name</th><th>Activated</th></tr></thead><tbody><tr><td>1</td><td>testrolle_testing</td><td>Yes</td></tr><tr style="border: 2px solid orange;"><td>2</td><td>testrole</td><td>Yes</td></tr></tbody></table>	#	Name	Activated	1	testrolle_testing	Yes	2	testrole	Yes	The roles created in the Designer will automatically appear in the roles list in the user management where they can be managed and assigned to users.
#	Name	Activated								
1	testrolle_testing	Yes								
2	testrole	Yes								

Creating a Role in BPaaS

	<p>BPaaS design users can create roles during modelling in the BPaaS editor by using the Role element.</p>
	<p>In BPaaS, a wizard supports the design user when creating a new role.</p> <p>The user can choose if he wants to select an already created role or if he wants to create a new role.</p>
	<p>The roles created in BPaaS will automatically appear in the roles list in the user management where they can be managed and assigned to users.</p>
