

Troubleshooting

Errors may occur while working in **Scheer PAS**. To facilitate troubleshooting, corresponding error and notification messages are displayed in the application. The overview of error messages allows you to identify possible causes and possible solutions. It also refers to documentation pages that contain further details.

Error handling is available for the following Process Mining tools:

- [Error Handling Analyses](#)
- [Error Handling Monitored xUML Services](#)
- [Error Handling Process Mining Administration](#)

Overview of Analyses Errors

	Incorrect analyses are displayed in the content area.
