

# convertDateTimeToStructure

|                |                                                                                              |                                                                                                                                  |
|----------------|----------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------|
| Syntax         | <pre>set aDateTimeOutputStructure = aDateTime.<br/>convertDateTimeToStructure();</pre>       |                                                                                                                                  |
| Semantics      | convertDateTimeToStructure() converts a DateTime object to a DateTimeOutputStructure object. |                                                                                                                                  |
| Substitutables | aDateTime                                                                                    | Can be any variable or object attribute having the type <b>DateTime</b> .                                                        |
|                | aDateTimeOutputStructure                                                                     | Can be any variable or object attribute having the type <b>Base Components.Basic Behavior.DateTime.DateTimeOutputStructure</b> . |
| Examples       | <pre>set aDateTimeOutputStructure = aDateTime.<br/>convertDateTimeToStructure();</pre>       |                                                                                                                                  |
