

compact

Syntax	<pre>anArray.compact()</pre>	
Semantics	Removes NULL elements of the array <code>anArray</code> . This is a convenience operation that can be used instead of <code>select from anArray where element.exists()</code> .	
Substitutables	<code>anArray</code>	Can be any variable or object attribute having the type Array .
Examples	<pre>set compactArray = anArray.compact();</pre>
