

# Creating Shared Designer Namespaces

A common use case in the Designer is that multiple users want to work in a shared namespace. Namespaces are created and assigned in the **Scheer PAS User Management**. If you want to create a (shared) namespace, you must have permission for the user management: Only users with profile **user\_management\_admin** are able to work in the user management.

## Creating a Namespace

|  |   |
|--|---|
| <div><div><div>User Management</div><div>Administrate User Settings</div></div><div><div></div><div>Configure user settings for the platform.</div></div><div><div></div><div></div></div></div>  | <p>In <b>Scheer PAS User Management</b>, we are using profiles to grant the users the necessary permissions for the platform components. A Designer namespace is a special profile.</p>   |
| <div><div><div><div></div><div>Users</div></div><div><div></div><div>Profiles</div></div><div><div></div><div>Add Profile</div></div></div><div><div><div></div><div>Roles</div></div><div><div></div><div>Permissions</div></div><div><div></div><div>Activities</div></div><div><div></div><div>Export</div></div><div><div></div><div>Import</div></div></div></div> | <p>Namespace is the term for the memory location where the data of this profile is saved. In a profile without namespace, no data can be saved. You can not add or delete a namespace to/from an existing profile after creation.</p> <p>If you want to create a (shared) namespace for the Designer, open the user management menu <b>Profiles</b> and click <b>Add Profile</b>.</p> |

Roles (3)

If you want to grant the user write permission, you have to switch to the user's data

Sheet and enable the corresponding checkbox in section Profiles.

Now all assigned users will see the namespace in the Explorer of **Scheer PAS Designer**.

If a namespace has been

en assigned to your user and you cannot see it in your Explorer tree, reload the page. It should then be displayed
