# Removing Libraries

You can remove a used library from a service. You can do this

- via the Asset Drawer
- via the Manage Libraries dialog
- via the context menu in the service panel

## Removing a Library via the Asset Drawer

| | |
|---|---|
|  | Open the **Asset Drawer** in the service where you use the library you want to remove. |
|  | To remove a library from your service, click **Remove** on the corresponding list entry. |
|  | A confirmation dialog opens.<br><br>Click **Yes** to remove the library from the service.<br><br>The library will be removed even if one or more elements of the library are still used in the service. In this case the implementation of the service may become invalid. |

**On this Page:**

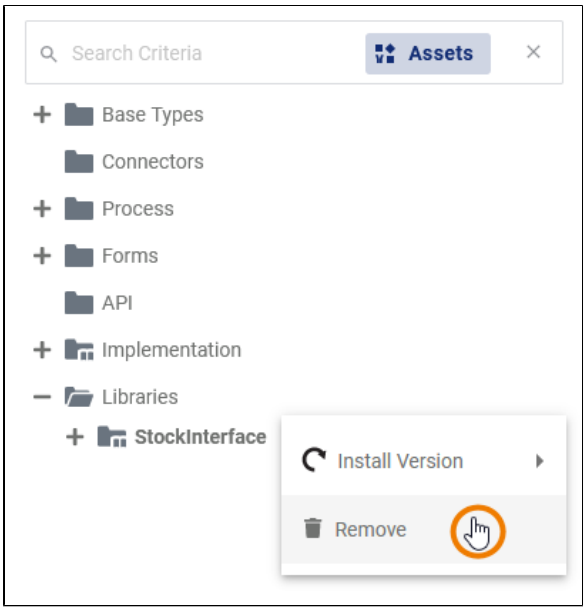
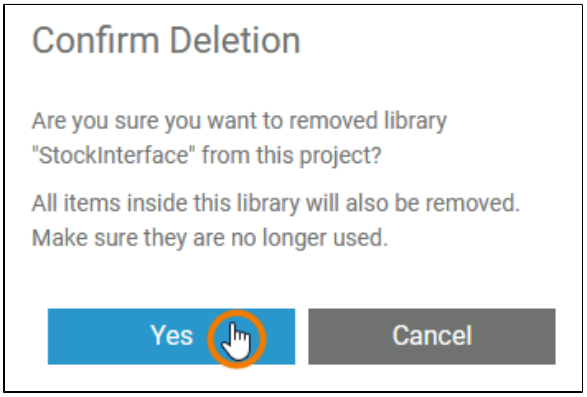
| | s e rv ic e m a y b e c o m e in v al id. |
| | The library will switch back to the **Unused Libraries** column.<br><br>Confirm the removal with the **Sav e** . |

## Removing a Library via the Context Menu

| | |
|---|---|
|  | Right click a library in the **Librarie s** folder of the service panel to open its context menu. |



To remove the respective library from your service, click **Remove**.



A confirmation dialog opens.

Click **Yes** to remove the library from the service.

The library will be removed even if one or more elements of

the library are still used in the service. In this case the implementation of the service may become invalid.

| | |
|---|---|
|  | The library has been removed from the service and is no longer displayed in the service panel. |

You can also remove a library version from the whole Designer namespace instead of removing it from the service only. You can do this in the library administration, refer to Administrating Libraries > Deleting a Library Version.

> ⚠ If you delete a library version in the administration that is still in use, the implementation of all affected services may become invalid.
