API Implementations

You can create your own custom REST service using the Designer. The following pages describe how to implement a REST API.

Additionally, the Designer comes with many adapters that allow you to access a variety of backends via different interfaces. For more information on these service adapters refer to Adapters.

This documentation covers the following topics:

- REST API
  - Defining a REST API
  - Implementing REST Methods
  - Handling Blobs in the REST API
  - REST Error Handling
  - Calling the REST API
  - REST Service Reference

RESTAPI_SupportManager_Example

Click the icon to download a simple example model that shows the implementation of a REST API with **Scheer PAS** *Designer*.

RESTAPI_BlobContent_Example

Click the icon to download a simple example model that shows the implementation of a REST API that receives and returns Blob content with **Scheer PAS** *Designer*.
