Simple_Form_Example

Click the icon to download a simple example model that shows how you can **configure form elements in Sche er PAS Designer**.

Configuration Options

Use the **Attributes** panel to edit the form element.

Attribute	Description	Allowed Values						
Name	Technical identifier for data processing and not visible for the end user.	Alphanumeric characters and underscore. <div style="border: 1px solid #ccc; padding: 5px; margin-top: 10px;"> It is not allowed to start the name with a number.</div>						
Description	A commentary field for the developer. The content is invisible to users and its sole purpose is internal documentation.	Any string.						
Label	Field name shown in the form.	Any string.						
Style	Click  to open a new window for editing. You can find more information under Syle Editor.	Any string.						
Vertical Alignment	The attribute is used to adjust the position of a form element in context to a bigger neighboring element. Example: The Radio Button Group Color is much bigger than the Button Next , but the button should be shown at the bottom of the form. Therefore, the button's attribute Vertical Alignment is set to Bottom . 	<table border="1" style="width: 100%;"><tr><td>T op</td><td>Align the element on top of the element cell (default).</td></tr><tr><td>C e n t er</td><td>Align the element in the middle of the element cell.</td></tr><tr><td>B ot tom</td><td>Align the element at the bottom of the element cell.</td></tr></table>	T op	Align the element on top of the element cell (default).	C e n t er	Align the element in the middle of the element cell.	B ot tom	Align the element at the bottom of the element cell.
T op	Align the element on top of the element cell (default).							
C e n t er	Align the element in the middle of the element cell.							
B ot tom	Align the element at the bottom of the element cell.							
CSS Class	Enables a field-accurate layout customization.	A valid CSS class.
