

Rich Text Attribute

Creating a Rich Text Attribute

The screenshot shows a rich text editor interface. At the top is a toolbar with various icons for text formatting (bold, italic, underline, strikethrough, text color, background color, bulleted list, numbered list, link, unlink, indent, outdent, undo, redo) and a search icon. Below the toolbar is a text input area containing the placeholder text "Enter message body". At the bottom right of the text area are two buttons: "Save" and "Cancel".

When **Rich Text** attribute is selected, a pop-up window with many **text editing and formatting** options will appear.

Save the entry by clicking **Save**.
