Copy Model (as Image) to the Clipboard

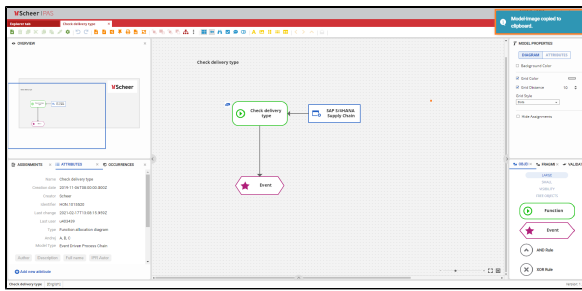

One of the reports provides the option to **Copy model (as image) to the Clipboard**.

On this Page:

- [Copy Model \(as Image\) to the Clipboard](#)

Related Pages:

When you click on the **Copy Model (as image)** icon in the toolbar, the model shown on the canvas or the selected part of that model will be copied to the clipboard as image.

The image copied in the **Clipboard** can be pasted in any office software, e-mail application or similar programs.

When generating a model image, the background of the image will not be transparent but in the white default color or in the background color that the user has defined independently within the **Model Properties** panel.
