

Docker Setup

In this chapter of the Administration Guide you can find information on how to manage your services in the administration component of a PAS installation with Docker compose:

- [Controlling Docker Container](#)
 - [Adapting Docker Container Configuration](#)
 - [Changing the Log Level of a Docker Container](#)
 - [Showing Docker Container Logs](#)
- [Controlling Containerized xUML Services](#)
 - [Adapting the Configuration of Containerized xUML Services](#)
 - [Changing the Log Level of a Containerized xUML Service](#)
 - [Persistent States of Containerized xUML Services](#)
 - [Showing Logs of a Containerized xUML Service](#)
- [Controlling Integration Services](#)
 - [Adapting Integration Service Configuration](#)
 - [Showing Integration Service Logs](#)

If your Scheer PAS installation is running on a Docker compose setup, the containers are handled on a single server.
