Both ways will open the logs of the correspondi ng Kubernetes workload in the Log Analyzer where you can view, filter and search the platform logs for all services.

yzerforthefisttimeonanewlyinstalled platform , you will have to create an index pattern first, referto Creatin

- High Availability cluster: Log files are deleted after 30 days.
- Integration (Bridge) logs: The default retention time for Bridge logs is 30 days. This
 is configurable in the UI, refer to Integration Platform User's Guide > Node Instance Preferences.

Showing the Service History Log

Iterative and the second se	In the History Log section you can inspect the service history. The log shows all actions of the xUML service (creation, start, stop etc.) including setting changes. The content of the history log is read-only.
Date User Action 28/02/2024 jerry.cotton AO_SRV_BPMN_RESTSERVICE_MAXREQUESTHEADERSIZE changed from 8 to 10	Use the filter field to search for a specific entry. The content of the filter field is applied to the column Action o nly.
