

getCurrentUserRoles

Non-static operation.

This operation returns a list of all roles that have been assigned to the current user. You need a current security service object to call this operation (which you can get using [getSecurityService\(\)](#)).

Interfaces

- `getCurrentUserRoles() : Array of String`
- `getCurrentUserRoles(in filterRoles : String[]) : Array of String`

Parameters

Name	Type	Direction	Description	Allowed Values / Example
filterRoles	Array of String	in	Specify a list of roles that will be used to filter the available roles.	<code>acme_manager</code> , <code>acme_employee</code>
	Array of String	return	Returns a list roles that have been assigned to the current user. If filterRoles has been specified, the list only contains roles from the filter that have been assigned.	<code>acme_employee</code>
