

Administration

Administering **Scheer PAS API Management** comprises

- [API Management Backup and Restore](#)
- [API Management Housekeeping](#)
- [API Management Logging](#)
- [Managing Gateways](#)
- [Managing Users and Permissions](#)

The administration features can be selected from the **Administration** menu.

The screenshot shows a sidebar menu with five items: APIs, Clients, Organizations, Administration, and Notifications (2). The Administration item is highlighted with a hand icon. To the right of the sidebar, the Administration menu is expanded, showing three sub-items: Manage Roles, Manage Gateways, and Export/Import Data.

Administration

- Manage Roles
- Manage Gateways
- Export/Import Data

Information: Menu item **Administration** is only displayed in the [sidebar menu](#) if the user has been granted administration rights. One administrator has been created during installation of API Management.

For more information about API Management users and roles and how to create additional administrators, refer to [Managing Users and Permissions](#).
