

Unsubscribing from an API

Private APIs are only accessible for known consumers, called clients. Each client can consume multiple APIs within API Management. The relation between client and API is defined via a contract and a plan.

Breaking a Contract

If you want to unsubscribe from an API you are currently consuming with one of your clients, you got to tab **My Clients** in the API Developer Portal.

All contracts are displayed within the client tile as well as in the right sidebar.

Expert Advice

Use the sidebar for reasons why navigation within the **My Clients** tab.

	<p>If you manage several contracts within one client, for each contract a separate deletion icon  is displayed.</p>
	<p>Use it to break a single contract.</p>
<div data-bbox="162 1060 722 1186"> <p>Delete Contract</p> <p>Are you sure you want to delete the contract between DextersClient and ACME Currency Converter?</p> <div> Cancel Delete Contract </div> </div>	<p>For security reasons, you need to confirm the deletion.</p>

Deleting a Client

	<p>You can also break all contracts of a client at once, but be careful: This will delete the whole client!</p> <p>Use the  icon on top of the client tile to remove the whole client and its content.</p>
