

Notifications

PAS 22.1 The **Notifications** menu informs you about important events in API Management and the API Developer Portal.

 The notifications can also be sent by email. This feature must be enabled during the setup of your **Scheer PAS** installation. Ask your **Scheer PAS** administrator for help.

Notifications are sent on the following occasions:

Occasion	Recipients	Notifications Inbox	Email
New API sign-up request for an "approval required" API	<ul style="list-style-type: none">All members of the organization with planAdmin permission.The person who requested API access.	✓	✓
Approval of an API sign-up request	The person who requested API access.	✓	✓
Rejection of an API sign-up request	The person who requested API access.	✓	✓
Publication of a client	All members of the organization with clientAdmin permission.	✓	✗
API is retired	<ul style="list-style-type: none">Every user with clientAdmin permission and an existing contract between their client and the retired API.A notification will be sent for every affected contract.	✓	✓

 Notifications (2)

The **Notifications** menu is displayed directly in the sidebar of API Management. Click the menu option to open the notifications.

The number of new notifications is also displayed in the sidebar. All notifications are displayed in a list:

The notifications are also available in the API Developer Portal:

In the API Developer Portal, you can select between different notification views (**Unread**, **Read**, **All**). Use icon  to mark a notification as read.

Functionalities of the Notification List

The notification list in API Management displays all unread messages, which makes it a task list for the administrator.

Icon	Description
	Indicates an information message .
	Indicates that the administrator has a pending task .
	Click this icon to mark the message as read. The action removes the message from the list.

The messages in the notification list are interactive: Click on a message to go to the corresponding location.

 Once a message is clicked, it disappears from the list of notifications.

Information Messages

 Client App A client was published 10 minutes ago 	<p>Information messages inform the administrator only about an event in API Management.</p> <p>Example: A new client has been published within API Management.</p>
 Client App A client was published 16 minutes ago  	<p>Click the message in the notification list...</p>
