

Scheer PAS | API Management Guide

Scheer PAS API Management is a component that helps you to manage APIs (Application Programming Interfaces) and API requests. It is situated between the API and the client. It enables you to apply different policies, enforcing them as runtime rules for each managed API request made.

In the API Management Guide, you can look up the functionalities of **Scheer PAS API Management** such as

- Centralized governance policy application.
- Leveraging common policy configuration across different APIs.
- Tracking of APIs and consumers of those APIs.
- Easy sharing and discovery of APIs.
