

# Deleting a Plan

### Expert Advice

Do not delete APIs, plans, or clients and recreate them if you want to change policies or settings. Instead:

- As concerns APIs and clients: Retire the old version, so it will not be callable anymore. Alternatively, skip this step if you want both versions - old and new - to be available.
- Create a new version of the element you want to change.
- Re-publish or re-register the API or client.

If you really want to remove a plan, click **Delete**  on top right of the plan's details page.

You cannot delete a locked plan. Locked plans are deleted only when the entire organization is deleted.

## Confirm Plan Deletion

Are you sure you want to delete this plan?

☒ I confirm that I want to delete this plan.

Delete

Cancel

Since a plan includes several important information such as versions, policies and change logs, you will have to confirm, that you want to delete the plan.

Option **Delete** is only enabled if you activate the checkbox.

Plan deleted successfully

A toast message indicates successful deletion.
