Tutorial 1: Modeling BPMN and Forms

In our first tutorial, you will learn the basics of application creation: You start by modeling a business process in the form of a BPMN model. Then, you will create the forms that application users need to fill out during process execution. Follow our example user story and help David Stringer perform his tasks.

> ⓘ All content in a lighter font color refers to the story of the tutorial.

Follow Our Example User Story

David Stringer of ACME Corp. has newly installed **Scheer PAS** *Designer*. Now, he wants to get a first impression on the capabilities, and so he is going to implement a simple order approval service for their purchasing department:

- Employees can file orders for internal purchase.
- They are only allowed to place orders that do not exceed a given limit. Such orders are forwarded to the supervisor, who has the option to approve or reject them. Orders below that limit should be processed automatically.
- The purchase orders are maintained in an ERP system.

You are going to help him with that task.

> ✓ If you are doing a trial and you have already received your personal credentials, you can access the PAS systems as follows:
>
> - **Prospects:** As an interested party, please use the URL to our **TRY** system: https://try.scheer-pas.com/pas/app/portal/home.
> - **Customers:** If you are a PAS customer, you can use your own customer system for the tutorials. Tip: Have an administrator create your own profile for you.
> - **Scheer Employees:** As a Scheer colleague, you can access the company's **TRIAL** system at https://demo.scheer-solutions.com/pas-trial/app/portal/home.

Start Tutorial 1 with the necessary preparations
