# Step 7: App Execution

Your app is ready to be executed. Open your **Scheer PAS** *Cockpit*.

Creating a new Instance

In addition to the start link of project ACME Idea Management two new start links are now available:

- Idea Management - Create
- Idea Management - Overview

To start the process app, you can directly use these links in the sidebar - or you create corresponding tiles on your cockpit.

Since mobile start links are only executable on mobile devices they are not displayed in the cockpit.
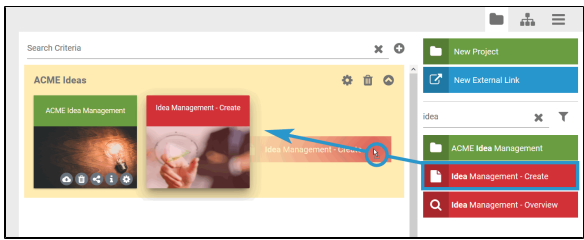

Drag a start link from the sidebar and drop it in the group on the cockpit to create a tile.

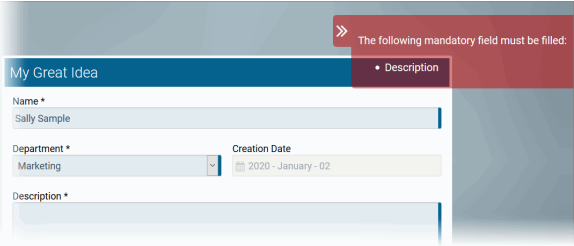

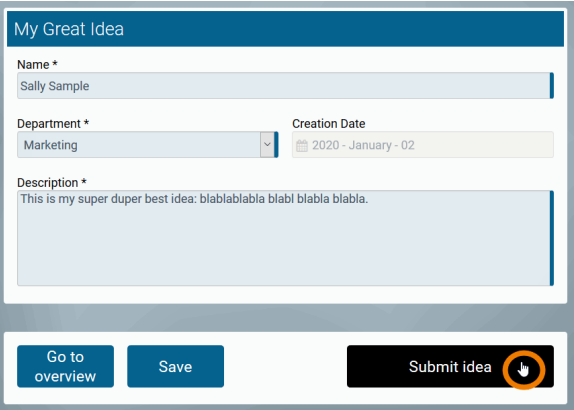

If you click on the tile or the link, the corresponding form will open and you can enter data.

Use the **Create** tile or link to open your first input form.
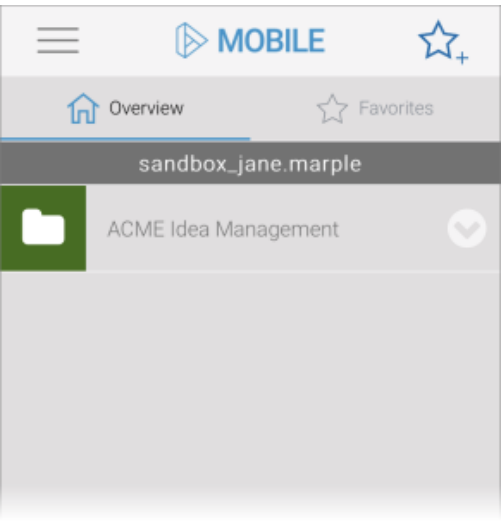

By default, the template **CSS Blue** is assigned to the reference and th

My Great Idea The following mandatory field must be filled: • Description Name * Sally Sample Department * Creation Date Marketing 2020 - January - 02 Description *	Required fields will be checked. If they are not filled, a corresponding message will be displayed.
My Great Idea Name * Sally Sample Department * Creation Date Marketing 2020 - January - 02 Description * This is my super duper best idea: blablablabla blabl blabla blabla. Go to overview Save Submit idea	Click **Next** to switch to the next process step - and to your second input form.

Since the second process step is conntected to a mobile form, it is only executable on a mobile device with the **Scheer PAS** *Mobile* app.

Mobile Execution

Open the **Scheer PAS** *Mobile* app on your mobile device.

> ℹ For information on installing **Scheer PAS** *Mobile* visit the Mobile App Installation Guide.

The project ACME Idea Management is displayed on the start screen.

Touch the project to open it.

Within a project, all app projects containing mobile forms are displayed.

Tap on your app project Idea Management to open it.

Within the app project you will find the overview start link Idea Management - Mobile Overview. Since you already created one instance, the instance counter displays the number 1.

As you activated the option **Show as Favorite** for the Idea Management - Mobile Overview, you have also direct access to the element by opening tab **Favorites**.

Tap on the overview link.

Approval

Approval *
⦿ Yes   ○ No

Fields marked with * are mandatory.

CANCEL   SUBMIT DECISION

The input form Idea Check opens.

Approve the idea.
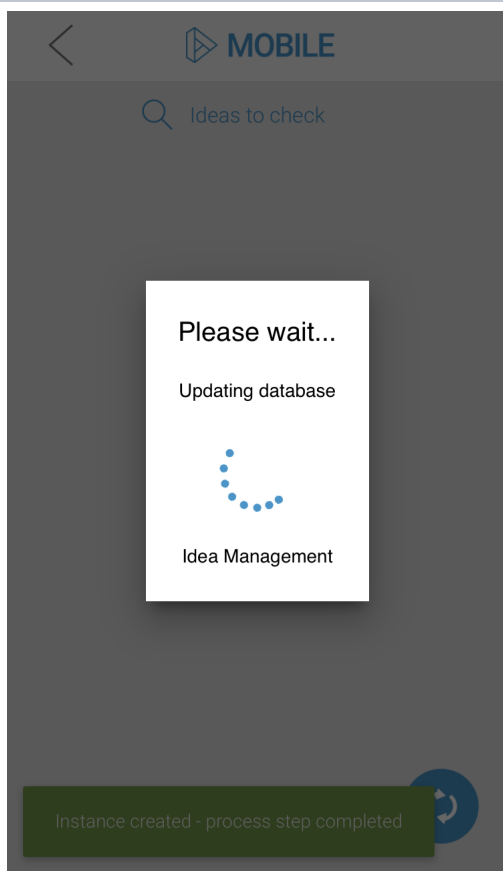

Your input is saved, the instance is sent to the next process step which is indicated by the green toast message:

- **Instance created - process step completed**

The data is uploaded. During the upload a corresponding message is displayed:

- **Please wait... Updating database**
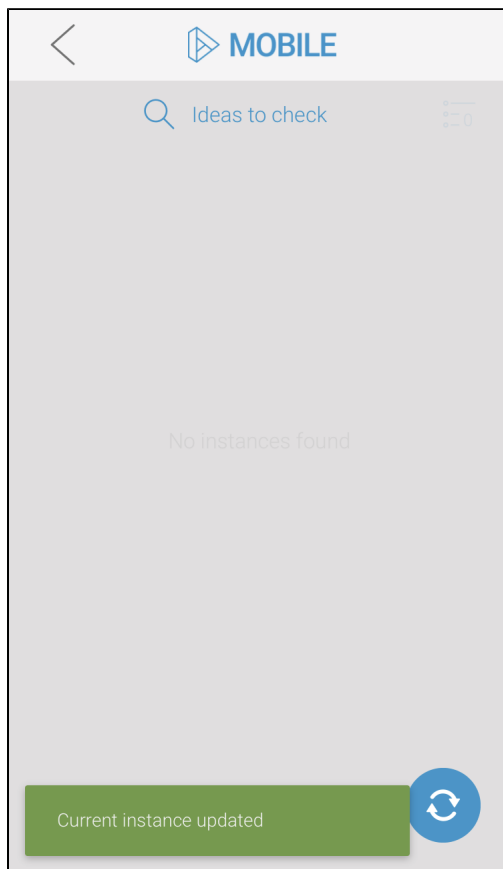

After successful upload the overview is empty because there are currently no other instances in process step Check idea.

Open your **Scheer PAS** *Cockpit* again.

Finishing the Process

ACME Ideas ⚙ 🗑 ⌃ ACME Idea Management Idea Management - Create Idea Management - Overview ①	The counter of the overview tile shows one available instance. Open the overview.
Filter Name Department New **List of Ideas** Instances table	Date	Name	Department	Approval		01/02/2020	Sally Sample	Marketing	Yes		The instance table displays the instance that you have just created and approved. Click on the displayed instance.
Congratulations! Super, great idea! Your idea was approved and will be implemented soon. Way to go! Go to overview Show Summary	The instance will open in the next process step. Since you approved the idea in the last process step, the Congratulations form will open. Click the **Next** button (Show Summary) to send the instance to the next process step.

Summary	The summary form opens displaying the instance data.
Creation Date — 2020 - January - 02	
Name — Sally Sample	
Department	Click the button Fin ish Process to send the data to the next process step.
Name — Value	
Marketing — 4	
Description — This is my super duper best idea: bablablablabla blabla bla blabalba.	
[Go to overview] [Finish Process]	

The process is finished for this instance. The data of the last process step is displayed. Changes are not possible.	Since the process step Displ ay summary is the last process step, the data is now displayed in read-only mode and a corresponding message is shown.
Summary
