Installing the BRIDGE Installer

If you want to update an existing BRIDGE installation, please refer to Updating a BRIDGE (Installer).

For a complete installation, execute the following steps:

- 1. Install the BRIDGE program files. There are two standard installation routines available:
 - Guided installation with a GUI (see Guided Installation of the BRIDGE with GUI)
 - GUI-less installation (see Gui-less Installation of the BRIDGE)
- Check if the installation was successful (see Checking the Installation).
 Install a licensing file (see Installing a BRIDGE License Key).
