

Using a Template

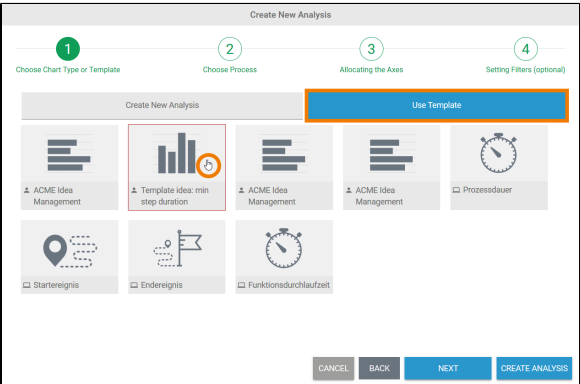

You can use your templates during the creation of a new analysis. The template settings are applied to the new analysis, but you can also adjusted them during the [creation of an analysis](#).

If you wish to use a template to create an analysis, select the **Use Template** tab in the [Create New Template Wizard](#).

In step 1 of the wizard, your templates are shown. Select the template you wish to use.

If the template already contains the basic data for an analysis, option **Create Analysis** is enabled and you can generate the analysis immediately.

If you need to complete or edit the template settings, click **Next**.

Create New Analysis

1 Choose Chart Type or Template

2 Choose Process

3 Allocating the Axes

4 Setting Filters (optional)

Profile: acme_corp

- Catalog
- Customer Database
- Damage Reporting
- Employee Database
- Idea Management
- Onboarding of New Employees
- Orders

CANCEL BACK NEXT CREATE ANALYSIS

You can progress through the wizard step by step and make adjustments to the default settings **process, axis allocation and filter**.

i The chart type is determined by the template and cannot be changed.
