

getPortFromAlias macro

All macros that get information from aliases are deprecated since Builder 7.5.0. Please use the new [Alias Reader](#) instead.

Syntax	<code>getPortFromAlias()</code>
Semantics	Returns the tagged value port specified on the component instance or instance.
Examples	<code>set portNumber = getPortFromAlias();</code>

Example File (Builder project E2E Action Language/Operating):

	<code><your example path>\E2E Action Language\Operating\uml\deploymentMacros.xml</code>
---	---
