

Service Implementations

The Bridge provides interfaces to act as a variety of services. Additionally, the Bridge comes with many adapters that allow you to access a variety of backends via different interfaces. For more information on these xUML service adapters refer to [xUML Service Adapters](#).

Find here a list of all available services in alphabetical order.

- [FTP Service](#)
- [HTTP Service](#)
- [Java Callback Service](#)
- [REST Service](#)
- [SAP Service](#)
- [Scheduler Service](#)
- [SOAP Service](#)
- [Timer and Event Observer Service](#)
